I am a Software Engineer in the making at Belgium Campus, currently busy with my second last year. I have some knowledge on coding, designing websites and I am ever-expanding my knowledge on any interesting topics. I am a fantastic problem solver, and a good people person. I am a quick learner, and a perfectionist.

EDUCATION

2016 - 2018

MATRIC, HOËRSKOOL OOS-MOOT

Had Business, EGD and Physical Science. Had German for 2 years. Can speak Afrikaans and English fluently.

2019 - 2022

B.COMP., BELGIUM CAMPUS

Majoring in Software Engineering. Chose IoT and Machine Learning as my electives.

2021

AZURE AI FUNDAMENTALS (AI-900), MICROSOFT

Attended the webinar and completed the webinar questions. Waiting for the exam to get the certificate.

2020

BLOCKCHAIN INTRO, MICROSOFT

Completed the Blockchain program.

PRESENT

UDEMY COURSES

I'm currently busy with a Web Developer Bootcamp that covers an in-depth curriculum on more than just the basic stuff. I also have a complete Python bootcamp, MySQL bootcamp, automate boring stuff with Python, .NET Core and React and a Flutter and Dart Course waiting for me after this Web Developer Bootcamp.

SKILLS

- Problem Solving
- Quick Learner
- Professional
- Perfectionist
- Sharp

- Creative
- Devoted
- Loyal
- Factual driven
- Meticulous

ACTIVITIES

I'd like to mention that I was accepted on the board of SRC (student Representative Council) at my campus. I love music, and I am taking music classes each week. I love to workout, whether it be gym or jog. I feel that the music and exercise is a great detoxing method to clear my thoughts and make me the person I am. I have an overall great attitude towards life, and I usually speak my mind on matters, even if it sometimes come off as rude. I feel this creates a better connection with people when they understand that I'm open.

I have a great interest in Crypto and Finances, and I'm currently experimenting with mining Bitcoin from our home server. I think of upgrading in the future when GPUs aren't as scarce.

We recently bought a new router for our home (Dream Machine Pro), and I am experimenting with that, by managing it. I am also in the process of setting up IP Cameras. The make of the products we use is called Ubiquiti Unifi.
